SUMMARY

Seasoned Engineering Leader operating at the intersection of data and context. Passionate about AI-powered transformation, I design and scale secure, cost-optimized, and available systems that accelerate business outcomes. Skilled in taking products from 0→1 to enterprise scale. With strong FinOps expertise, I help organizations cut cloud costs and optimize outcomes. Through a DevSecOps mindset, I enable teams to iterate faster, more securely, and with greater resilience. Customer-obsessed and outcome-driven, I have a proven record of delivering scalable, resilient, and business-aligned cloud solutions that create long-term value.

EXPERIENCE

Senior Cloud & Security Architect

2025 - Present

Bespoke Labs via a.team (contract)

Mountain View, California

Series A AI lab.

- Built a cloud-agnostic eval-sandbox platform running AI-agent workloads in isolated Firecracker microVMs across AWS and GCP, with snapshot and restore that survives Spot preemption.
- Cut cloud spend 30% through FinOps and led SOC 2 and security compliance for the platform end to end.
- Made key contributions to Horizon, the core RL platform – authoring RL tasks, grading rubrics, and evals that model the tool environments and reward logic agents are scored against.

Head of Engineering & Founding Engineer

Dec 2023 - 2025

CREE8

California, United States

Streamlines cloud adoption for creative teams through centralization, automation, and cloud-native workflows.

- Built and led a team of 10 senior SREs, DevOps, and Full-Stack engineers to deploy enterprise-grade cloud solutions.
- Achieved SOC 2 Type II and TPN Gold within 6 months by implementing AI-driven compliance automation workflows.
- Optimized multi-cloud operations, cutting costs 60% across AWS, GCP, and Azure through FinOps and architecture improvements.
- Pioneered Camera-to-Cloud workflows, enhancing content ingestion and collaboration across 50+ distributed creative teams.
- Accelerated iteration speed 40%, strengthened security, and boosted resilience by adopting AI and DevSecOps practices.

Senior Cloud DevOps Engineer

Aug 2023 - Feb 2024

Videotron

Québec, Canada

Led DevOps for high-traffic websites and streaming – deployed tooling, analyzed metrics, and built scalable infrastructure with hardened security for resilience and reliability.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate

Amazon Web Services (AWS)

AWS Certified Developer - Associate

Amazon Web Services (AWS)

EDUCATION

DEC, Computer Science

Cégep Garneau, Québec, Canada · 2008 - 2011

Senior Cloud Engineer · Contractor

Banque Fairstone

Sep 2022 - Aug 2023

Montréal, Canada

Led multi-region, multi-account disaster recovery on AWS with integrated monitoring for resilience.

Senior Cloud Engineer · Contractor

SSENSE

May 2022 - Sep 2022

Montréal, Canada

Implemented a loyalty system via Talon One integration, synchronizing historical and real-time data for reliable, efficient exchange with internal systems.

Senior Cloud Engineer

Dormakaba Americas

Oct 2021 - May 2022

Montréal, Canada

Designed a public API for third-party integration and built an abstraction layer simplifying lock configuration – improving client usability and developer experience in smart-access deployments.

Cloud Software Developer

Vanderlande

Sep 2020 - Oct 2021

Québec, Canada

Developed the PAX Divesting Assistant, a self-service app that lets passengers handle divestment independently – reducing agent reliance and boosting automation, security, and checkpoint efficiency.

Software Developer

Vanderlande

Mar 2018 - Oct 2021

Québec, Canada

Built globally deployed, decentralized software optimizing luggage throughput at airport checkpoints – improving processing efficiency, passenger experience, and operational performance.

Software Developer

PetalMD

Apr 2017 - Mar 2018

Québec, Canada

Developed a secure cloud platform enabling healthcare teams to orchestrate real-time patient care – boosting efficiency, streamlining processes, and improving outcomes.

Software Developer & DevOps

CGI - National Defense

Dec 2014 - Apr 2017

Québec, Canada

Built a suite of secure services supporting military planning and decision-making.

Co-Founder & CTO

Logicale

Sep 2011 - Jan 2014

Québec, Canada

Co-founded a software studio designing and developing custom web applications for clients.

PERSONAL PROJECTS

Diaspor

diaspor.io

Rust virtual distributed file system with built-in on-device AI that transcribes and auto-tags media locally.

Tablix

tablix.ca

AI SaaS that turns legal PDFs into structured Excel, Word, and PDF tables for legal professionals.

PlainLedger

plainledger.ca

KPI and benchmarking platform comparing Canadian small businesses through QuickBooks.

SST Diamantex

ssdiamantex.ca

AI safety app that logs hazards and preventive actions in 30 seconds with GPS, photos, and voice transcription.
